

How to setup High Speed Broadband for Malaysia (TM Unifi / Maxis fibre Home) For DIR-850L.

Step 1 Connect Your PC (Laptop) to the Router (Port 1,2,3,4 either one of them) using Network cable.

Step 2 Launch your IE (Internet explorer) and key in 192.168.0.1 in the address column and press Enter.

Step 3 Enter your Username: admin and no password (if it is default) click on Log In

A screenshot of the router's login page. It has an orange header with the word 'LOGIN'. Below it, the text 'Log in to the router' is displayed. There are two input fields: 'User Name : Admin' and 'Password :'. A 'Log In' button is located to the right of the password field. The fields and the button are circled with red ovals.

Step 4 You will see a D-Link configuration page, click on **Setup > Internet > Manual Internet Connection Setup**.

A screenshot of the D-Link configuration page. The 'SETUP' tab is selected and circled in red. On the left sidebar, the 'INTERNET' option is also circled in red. The main content area is titled 'INTERNET CONNECTION' and contains an 'INTERNET CONNECTION SETUP WIZARD' section with a button labeled 'Internet Connection Setup Wizard'. Below this is a 'MANUAL INTERNET CONNECTION OPTIONS' section with a button labeled 'Manual Internet Connection Setup' circled in red.

Step 5 For My Internet Connection select Unifi-PPPoE (Username / Password)

A screenshot of the 'INTERNET CONNECTION TYPE' selection screen. It asks to 'Choose the mode to be used by the router to connect to the Internet.' Under 'My Internet Connection is', the option 'Unifi-PPPoE (Username / Password)' is selected and circled in red. There is also a 'Disable NAT' checkbox which is unchecked.
