

## How to change the Wi-Fi Password?

## Method 1

Step 1: Open an Internet browser (such as Internet Explorer) and enter http://dlinkrouter.local or http://192.168.0.1 into the address bar.

Step 2: Enter the password for your Admin account in the field provided. If you have not changed this password from the default, leave the field blank. Click **Log In**.

To access your storage with SharePort Web Access, click here.

Step 3: Move the cursor to the Settings tab and then click Wireless from the drop-down menu.

DIR-880L

Step 4: In the **Password** field, specify the new wireless password for the desired wireless band. The password should be different for the 2.4 GHz and 5 GHz bands. Wireless clients will need this password in order to access your wireless network. This may require you to update your wireless clients' configuration.

× ⇔ v			
Settings >> Wireless		Guest Zone	Save
2.4GHz			٨.
