

How to set up Website Filtering ?

Step 1: Open an Internet browser (such as Internet Explorer) and enter `http://dlinkrouter.local` or `http://192.168.0.1` into the address bar.

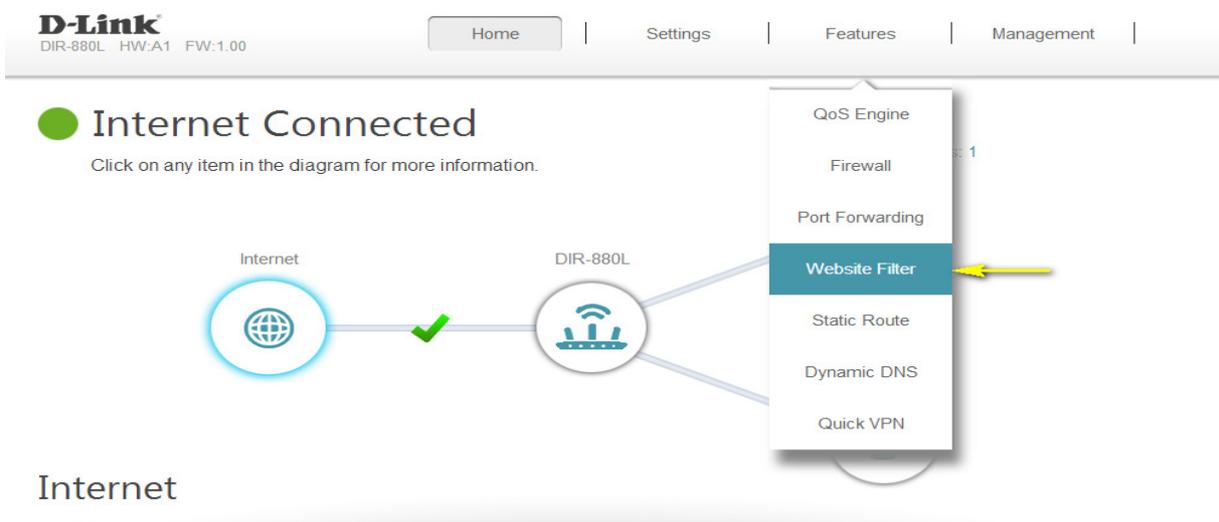

Step 2: Enter the password for your Admin account in the field provided. If you have not changed this password from the default, leave the field blank. Click **Log In**.

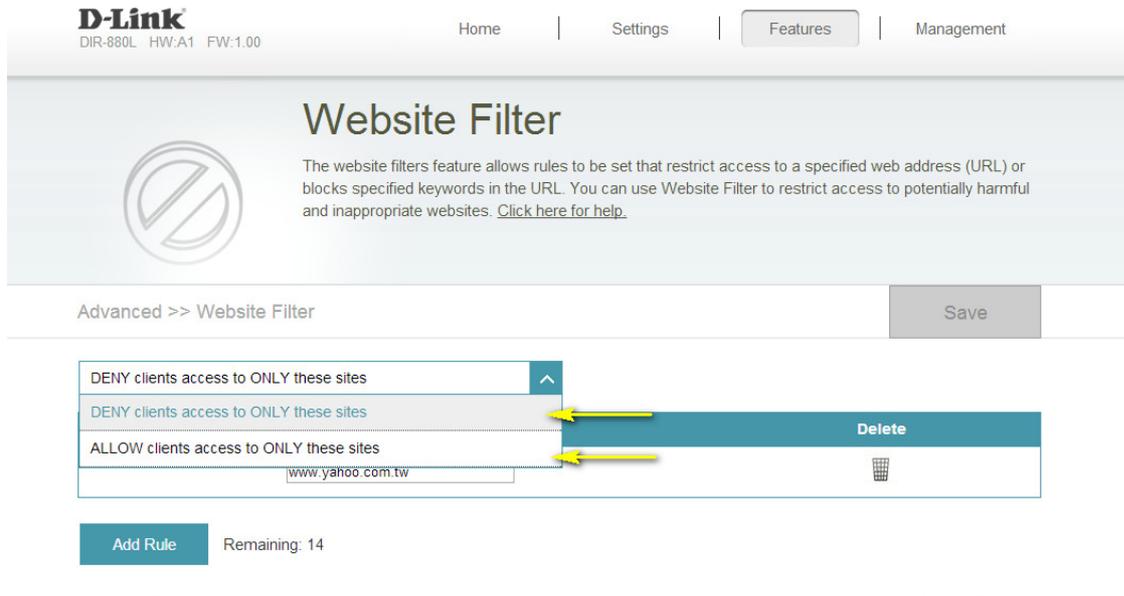

A screenshot of the 'Admin Password' login form. It consists of a white rectangular box with a label 'Admin Password:' at the top. Below the label is a single-line text input field. At the bottom of the box is a blue button labeled 'Log In'.

To access your storage with SharePort Web Access, [click here](#).

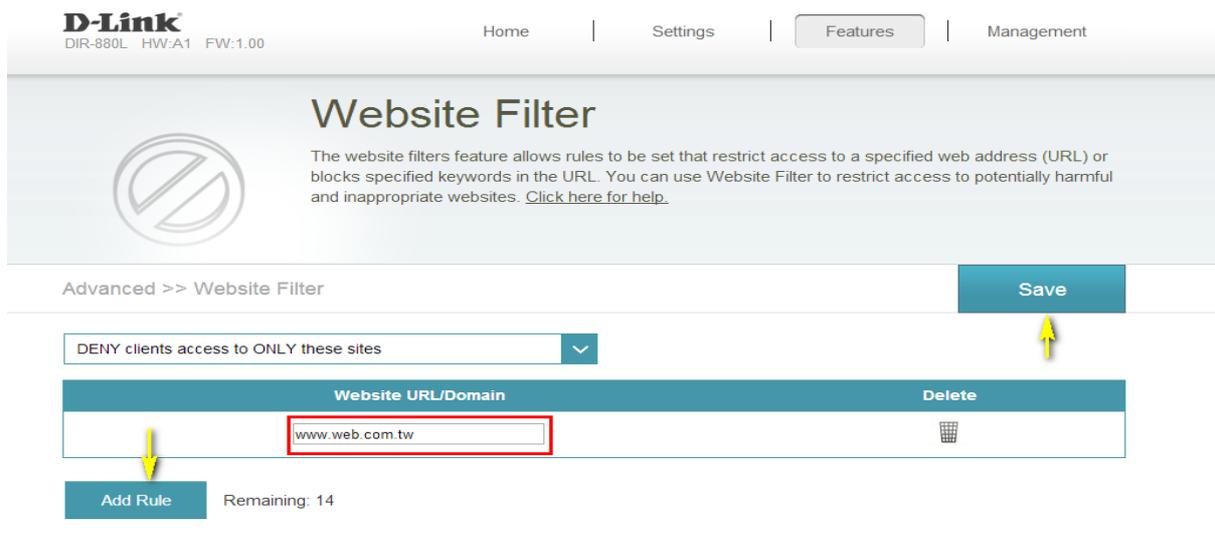

Step 3: Move the cursor to the Features tab and then click Website Filter from the drop-down menu.

Step 4: If you want to create a list of sites to block, **select DENY computers access to ONLY these sites** from the drop-down menu. All other sites will be accessible. If you want to specify a list of sites to allow, select **ALLOW computers access to ONLY these sites** from the drop-down menu. All other sites will be blocked.

Step 5: You may specify a maximum of fifteen web sites. To add a new site to the list, click **Add Rule**. Next, in the Website URL/Domain column enter the URL or domain you wish to deny or allow access to. If you wish to delete a rule, click on its trash can icon in the Delete column. If you wish to edit a rule, simply replace the URL or domain.

Click **Save** when you have created the desired rules to save your configuration.
