

How to disable IPv6 of DIR-890L for StarHub?

Note: This feature is recommended to be disabled if there are issues trying to access internet using Android devices.

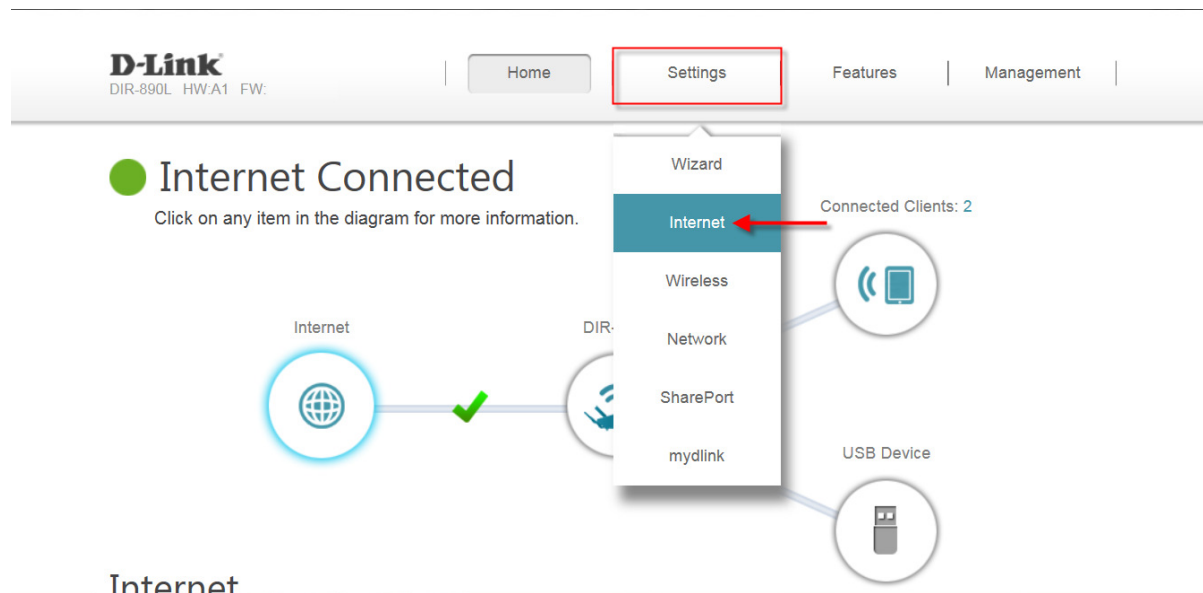

Step 1: Open your Internet browser and enter <http://dlinkrouter> or <http://dlinkrouter.local> or <http://192.168.0.1> into the address bar.

Step 2: Enter your login information. If you have not changed the default settings, the username is Admin and the password field should be left blank. Click **Login**.

A login form with the title 'Admin Password:'. It contains a single text input field for the password and a 'Log In' button below it.

Step 3: Click on the **Settings** tab at the top of the page and click **Internet** from the menu as shown.

D-Link® Technical Support Setup Procedure

Step 4: While in **Settings > Internet**, select **IPv6** tab as shown.

Internet

Use this section to configure your Internet Connection type. There are several connection types to choose from Static IP, DHCP, PPPoE, PPTP, L2TP and DS-Lite. If you are unsure of your connection method, please contact your Internet service provider. Note: If using the PPPoE option, you will need to remove or disable any PPPoE client software on your computers.
