

Features and Benefits

Web-based Home Video Monitoring

Get to your video images fast by simply opening up a Web browser and typing in your DCS-900's IP Address. This means anytime, anywhere access to your video stream using a Java-enabled Web browser.

Management Software

The DCS-900 includes IPView Lite software to enhance your video monitoring experience. Record to your hard drive, view up to 4 cameras on one screen and update the firmware on your DCS-900. The IPView Lite software also provides access and control to everything that is available in the Web interface.

Archive Streaming Video to Your Hard Drive

Save your video directly to your hard drive and create video archives. Video files are saved to your hard drive in .AVI format and is complete with date and time stamps to quickly and easily identify and organize your video content.

Compact Design

The DCS-900 fits right into your home or office environment. The DCS-900's compact design makes it suitable for discreet operation in any security monitoring application.

Integrated Web Server

The DCS-900 is an intelligent camera with its own CPU, web server, and IP Address, eliminating the need to directly connect it to your computer. Simply connect the DCS-900 to your network to begin viewing and recording video images!

10/100Mbps Fast Ethernet Connection

The DCS-900 features a standard RJ-45 Ethernet port, making it simple to integrate into your existing network infrastructure. An Ethernet cable is also provided, to make your installation even easier.

Recording Options

The DCS-900 features a variety of recording options through the included IPView Lite software to suit your particular monitoring application. The DCS-900 can be set for manual recording based on specific times and days or scheduled recording.
